

**WOLF**

Innovative Tool Solutions for the Automotive Industry

The automotive industry is defined by mass production in specially equipped manufacturing sites with a high degree of optimization and automation. Quality and delivery inspection of components have a high priority and the central focus is on strict cost control and high productivity.

WOLF, your competent technology partner, offers single-partner high tech machining solutions for these special requirements of the automotive industry.

Specially developed VHM special tools for pre- and finishing machining, with innovative geometries, cutting materials and coatings, are available for an economical working of components made of heat treated aluminum alloys, tempered or stainless steel, as well as abrasive cast iron base materials

Thanks to a years long and intensive cooperation with numerous customers of the automotive field, WOLF has developed into a recognized technology partner in the production fields of Common Rail injection systems, turbo loaders and motor components.

The combination of high grinding and machining understanding lead to technologically sensible and economical machining solutions.

If you are searching for new and innovative tools for component machining in the automotive industry, we deliver high-end solutions of the highest quality.

Ihre Zerspanungsaufgaben

- + **Transmission bodies and shafts**
- + **Distribution pipe and injectors of injection systems**
- + **Connecting rod and crank shaft manufacturing**
- + **ABS brake systems**
- + **Flywheels**
- + **Turbo loader component**
- + **Brake caliper and fixture**

**Customer specific tools
and services**

Thanks to our air-conditioned production area with modern CNC tool grinding machines and our own in-house coating we are able to deliver to our customers quickly, individually and at highest quality.

Customer specific tool development and application consulting belong to our services.
